Tracing Backward Template

**Learn**

- how to import a KNIME workflow into the KNIME desktop application

- Download the workflow you would like to import, e.g.
  "FCL_Example.zip"
- Right click on "LOCAL" in the "KNIME Explorer" view and select
 "Import KNIME Workflow".

- In the import dialog choose "Select file" and click the "Browse" button.

■ Select the downloaded zipped workflow and click "Open".

- In the Import dialog, you'll see the selected workflow.
- Click "Finish".

- In the KNIME workbench, expand "LOCAL" in the "KNIME Explorer" view and double click on the imported workflow.
- The workflow should show up in the "Workflow Editor" now (see red square).
